EDUCATION

KIT - KalaingarKarunanidhi Institute of Technology, Kannampalayam, Coimbatore - Tamil Nadu, India	2024 – 2027
B.E. Computer Science and Engineering (Artificial Intelligence and Machine Learning), Final year	CGPA: 7.2/10.0
Coursework: Machine Learning, Computer Networks, Operating Systems, Database Management Systems	
P.A Polytechnic College, Pollachi, Coimbatore – Tamil Nadu, India	2021 - 2024
Diploma in Electronics and Communication Engineering.	Percentage: 81%
Coursework: Electronic Circuits, Telecommunications, Embedded Systems, Simulations, Basic VLSI.	
Sri Lathangi Vidhya Mandir Matriculation School – Pollachi, Coimbatore – Tamil Nadu, India	2020 – 2021
Higher Secondary – All Pass	

EXPERIENCE

VVDN Technologies Private Limited – Pollachi, India (offline)	Nov - Dec 2022
- Assembled Bluetooth neckband devices by following standard manufacturing procedures to ensure consistent product quality. - Performed visual and functional quality checks to identify defects and maintain production accuracy. - Handled product packaging and final inspection while meeting daily production targets and maintaining workflow efficiency.	
Gateway Academy – Machine Learning Internship , Coimbatore, India (offline)	Dec - Jan 2025
- Worked on basic Machine Learning models such as regression and classification using Python libraries like NumPy, Pandas, and scikit-learn. - Preprocessed datasets by handling missing values, normalization, feature selection, and data splitting for model training and testing. - Built and evaluated ML models using accuracy, confusion matrix, and error metrics to understand real-world model performance.	
Front-End Internship at KK Academy , Coimbatore, India (offline)	May - June 2025
- Developed responsive web pages using HTML, CSS ensuring clean structure and user-friendly design. - Implemented interactive UI features such as forms, navigation menus, and dynamic page elements to improve user experience. - Collaborated on small front-end projects using best practices in layout design, debugging, and browser compatibility testing.	

PROJECTS

IoT Smart Pet Door Lock System Arduino, IoT Cloud, RFID/Ultrasonic Sensors, Servo Lock, Wi-Fi Module.	Nov 2025
- Developed an IoT-based pet door lock that automatically opens for authorized pets using sensors and microcontroller logic. - Integrated RFID/ultrasonic sensors to detect pet presence and control a servo/magnetic lock through real-time processing. - Built a mobile/IoT interface to monitor door status and ensure secure access for pets, improving safety and convenience.	
College Admission Probability Predictor Python, Logistic Regression, CSV Data Handling, Basic Front-End	Link Apr 2025
- Built a machine learning model that predicts the probability of a student getting admission to a specific college using 5 years of historical 12th-grade cutoff data. - Performed data preprocessing, feature extraction, and model training using regression/classification techniques to estimate admission likelihood. - Developed a simple user input interface where students can enter marks and desired college to receive a data-driven admission probability.	

TECHNICAL SKILLS

Arduino	Git	HTML	SQL	CSS
GitHub	Python	JavaScript	DSA	Java
Linux	OOPS	Computer Hardware		

CERTIFICATIONS & COURSES

AWS – Cloud Foundation	Link 2026
CISCO – Enterprise Networking, Security, Automation	Link 2026
NPTEL – Design Thinking	Link 2024
CISCO – Introduction to Cybersecurity	Link 2025
CISCO – Data Analytics Essential	Link 2026

COMPETITIVE PROGRAMMING

Leetcode: Rating – **2000** | Top 2.54% Globally | Max Rating - 2049 | Solved problems: **100+** | **Codeforces:** Max rating – 1784 | Position: **Expert** | Solved problems: **70+** | **Codechef:** Max rating - **1527** | Position: **2** Star | Problems: **300+** | Highest rank **579** in Starters 232 (Rated) in division **3** | **Global Rank** in Codechef: **28687**.
